OBJECTIVE

Passionate web developer with a solid foundation in JavaScript and proficiency in React. Committed to launching a successful career in development and design. Excited to apply my skills to impactful projects and thrive in a dynamic environment.

WORK EXPERIENCE

Conceptserve Technology - React Developer

Nov 2023 - Current

Ahmedabad Gujarat

- Led React development for Parking Management System, integrating WebSocket for live vehicle video and real-time number detection.
- Collaborated with stakeholders to design intuitive interfaces, integrating IoT devices for automation.
- Spearheaded research and implementation of cutting-edge technologies, resolving complex technical issues for both web and mobile environments.

PROJECTS

Contact Manager

I Created a Contact Manager with MERN stack (MongoDB, Express.js, React.js, Node.js). This web- app lets you easily add, view, update, and delete contacts, showcasing my skills in full-stack development and CRUD operations.

Facebook Clone

I developed a responsive Facebook clone using HTML, CSS, and JavaScript, replicating the familiar user interface. Explore the features, while ensuring seamless adaptability across various devices.
