I'm a front end developer proficient in React.js and React Native, having built PWAs and mobile apps with Firebase auth, custom Node/Express/MySQL APIs, Zustand/Context state management, and performance optimizations like code-splitting, lazy loading .

Skills

- Front End Development - ReactJS, React Native, Redux Toolkit, Recoil, JavaScript, Tailwind CSS, Material Ui, Bootstrap,
- HTML, CSS.
- Backend Development – Node.js, Express.js, MySQL, Socket.io

Experience

- **Front End Developer Freelance** Dec 2024 – Present
 - Worked on multiple projects (Websites & Apps) for CA firms, manufacturing (RakPolyplast), and startup (Kwicklingo).
 - Built complete frontend UIs in React.js using CSS/Tailwind CSS .
- **React Developer Conceserve Technologies** Aug 2023 -Sep 2024(1Year)

Project: PMS

 - Led the development and implementation of a **Parking Management System** using React and WebSocket, enhancing real-time vehicle monitoring and number detection, leading to a 30% increase in operational efficiency.
 - Developed both web and mobile applications, ensuring seamless integration and consistent user experience across platforms.
 - Acquired advanced skills in IoT device integration and troubleshooting across web and mobile platforms.
 - Implemented responsive design principles to ensure cross-platform compatibility of webpages and mobile apps.
 - Conducted extensive testing and debugging to maintain high performance and reliability.

Project: BuiAiSolution

 - Performed end-to-end integration testing of the entire web application to ensure proper functioning across different browsers and devices.
 - Designed, developed and implemented a MEAN stack web application with My SQL , Express Js, React Js, Node Js.
 - Developed and integrated a robust People Count feature for accurate monitoring within specified areas.
 - Provided real-time updates on occupancy, suitable for applications like crowd management and occupancy monitoring.
 - Successfully integrated an Automatic Number Plate Recognition (ANPR) system to enhance vehicle monitoring capabilities.
 - Deployed an advanced Smart Box Detection system for comprehensive monitoring and surveillance.
- **Trainee Web Developer Rayna Technologies** Oct 2022 – Nov 2022
 - Developed webpages using HTML, CSS and JavaScript to meet customer requirements.
 - Collaborated with senior developers to implement responsive designs and user-friendly interfaces.
 - Gained hands-on experience with version control systems like Git.

Education

- **JP Institute of Engineer and Technology** 2021
 - Bachelor of Computer Application
- **Rajasthan Institute of Engineering and Technology** 2024
 - Master of Computer Application
